

Discover the FX VAC Model 12 and Model 4—advanced vacuum systems designed for efficiency and reliability. Flexible solutions for all DCM applications and project integrations.

Model 4 Mobile: Up to 1,000 L with a vacuum pump of 100 m³/h, up to 4C

Model 4 Cell: Up to 3,000 L with 2× vacuum pumps of 300 m³/h, up to 4C

Model 12 Cell: Up to 6,000 L with 2× vacuum pumps of 500 m³/h, up to 12C

These models feature energy-saving operation, optimal flow control, and process stability, and are compatible with all evacuation devices such as Chill-blocks, Kinetic Valves, or Hydraulic Valves.

Choose maximum capacity or a compact solution—FX VAC adapts to your production needs.
